Contents

The contents of the lectures are intended to deepen and expand on findings and aims from the bachelor. The goal is to understand typologies as a cultural guideline, name their specific qualities and put them in a classification system. The students should be taught to apply the recognized qualities in their own architectural design plausibly and be able to give reasons for it.

Competencies / intended learning achievements

- Professional competence
- Methodological skills
- personal competence
- Social skills

Desired learning outcomes:

Students who successfully complete this module are able to,

- recognize building typologies and name their qualities and aspects
- apply different typologies competently in their own design and give reasons for it

Literature

Bibliographical references are given according to the seminar.

Materials

Materials are provided in the course and via learning platforms and websites of the subject areas.
